## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1, 5 and 9, the language used to describe the length of a set of orthogonal complex codes is indefinite. The length of the orthogonal complex codes is relative to a corresponding optimum real code length or a spreading code length. In other words these the orthogonal complex codes are described in the specification with reference to specific lengths such that there is a correlation between an orthogonal complex code and an optimum real code and a spreading code length (i.e.  $n=4$ ). The way that the claim reads these three different types of code lengths could be irrespective of each other and could refer to any arbitrary code length. All the examples in the specification use a common variable to show the correlation between the optimum real code and its corresponding orthogonal complex code. The current language is therefore indefinite. Claims 2-4 and 6-8 and 10 are also rejected by virtue of dependency thereon.

### ***Allowable Subject Matter***

Claims 2-4 and 6-8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
